Product Management and Product Marketing for the Telecom Sector

Ref.: 15179_283346 **Date:** 30 Jun - 11 Jul 2025 **Location:** London (UK) **Fees:** 9300 **Euro**

Introduction:

Product management and marketing PMM are crucial for companies to succeed, particularly in the evolving telecom sector. Combining strategic vision with market insights enables businesses to optimize resources and grow substantially. This comprehensive telecom sector product management and marketing PMM course deeply delves into both disciplines, focusing on B2B and B2C interactions in the Telecoms, IT, and Software industries.

Participants in this telecom sector product management and marketing PMM training will be equipped with best practice approaches, theoretical frameworks, practical techniques, detailed checklists, templates, and extensive course notes to enhance their productivity upon returning to their roles. This curriculum is designed to fast-track the accumulated skills and knowledge that ordinarily come with vast industry experience.

Product Marketing Manager Roles and Responsibilities:

Understanding the product marketing manager's roles and responsibilities is integral to the success of products in the telecom sector. This telecom sector product management and marketing PMM course will improve participants in market analysis, developing unique selling propositions, and designing go-to-market strategies that resonate with target customers.

A product marketing manager is deeply involved in crafting the messaging and positioning of telecom services and ensuring that marketing strategies are aligned with product capabilities and customer needs.
