

## Supply Chain Risk Management Training Conference

05 - 09 Aug 2024  
Milan (Italy)

# Supply Chain Risk Management Training Conference

**Ref.:** 8107\_286275 **Date:** 05 - 09 Aug 2024 **Location:** Milan (Italy) **Fees:** 4900 **Euro**

## Introduction

Effective supply chain professionals need to fully comprehend the critical importance of risk management in the supply chain. They must ensure their organizations become industry pacesetters by managing their supply chains adeptly, ultimately achieving reduced costs while improving service levels.

However, the intricacies of global trade have introduced proportionally high levels of risk and uncertainty. This uncertainty begets a risk spiral characterized by heightened costs and diminished service levels. Risk is an inherent element within all supply chains. Still, these risks can be sidestepped, managed, or redirected through meticulous analysis, preparation, and strategic action.

Smart organizations must, therefore, devise and implement comprehensive supply chain risk management programs to manage risk, uncertainty, and variability while simultaneously aspiring to cut costs and heighten service quality.

## The Importance of Risk Management in The Supply Chain

In today's business environment, the importance of supply chain risk management cannot be overstated. A resilient supply chain is vital for maintaining the continuity of operations and competitive advantage. Integrating a sophisticated risk management process in the supply chain enables organizations to anticipate potential disruptions and respond effectively to ensure that supply chains remain robust and responsive.

Participants will have the opportunity to earn a supply chain risk management certification, which will distinguish them as knowledgeable professionals in handling risk management for the supply chain, affirming their expertise in this critical field.

Engage with industry peers in seminars and workshops on real-world applications of supply chain risk management concepts, providing an interactive and hands-on approach to mastering the discipline.

This supply chain risk management conference is not merely a series of lectures but an immersive experience designed to equip supply chain risk managers and professionals with the essential tools to proactively address risks and ensure the resilience and optimization of their supply chains.

## Targeted Groups

- Head of Procurement
- Procurement Professionals
- Supply Chain Professionals
- Risk Management Professionals

## Conference Objectives

By the end of this supply chain risk management training conference, participants should be able to:

- Apply a comprehensive understanding of supply chain activities.
- Identify, analyze, and evaluate supply chain risk.
- Grasp the key aspects essential in mitigating risk.
- Utilize risk management tools and techniques.
- Facilitate supply chain organizational improvements.
- Comprehend the intricacies of current supply chains.
- Assess them for potential risks and vulnerabilities.
- Explore approaches to mitigate risks effectively.
- Implement appropriate risk management tools.
- Drive continual improvements within the supply chain framework.

## Targeted Competencies

- Analysis.
- Evaluation.
- Improvement strategies.
- Change management.
- Risk management.

## Conference Content
