Financial Management for Non-Finance Professionals Training Course

Ref.: 2024_286526 **Date:** 01 - 05 Sep 2024 **Location:** Kuala Lumpur (Malaysia) **Fees:** 3900 Euro

Introduction

Business professionals require a comprehensive understanding of financial factors crucial for success. This finance for nonfinancial managers course navigates the intricate workings of finance in today's dynamic business environment, emphasizing the pivotal elements of profitability, liquidity, and financial structure.

Participants in the finance for nonfinancial managers course will delve into accounting processes, recording and reporting transactions, and summarizing them as periodic financial reports. These reports, mandated by statutory requirements, undergo analysis by diverse user groups.

With an inward focus, the finance for nonfinancial managers course underscores the indispensable role of management accounting in business survival and success. It elucidates how budgeting acts as a tool to control costs and enhance profitability.

Additionally, the finance for nonfinancial managers course explores tools and techniques for evaluating new investment projects, enabling participants to grasp the business from financial and strategic perspectives and understand the impact of decisions on corporate profitability.

Targeted Groups

- Project professionals.
- Internal auditors.
- Nonfinancial professionals are contributing to business financial reports.
- Senior professionals in manufacturing, marketing, and engineering.
- Human resources professionals.
- Legal professionals.
- Executive professionals are involved in long-term customer, supplier, outsourcing partner, and global strategic alliance development.
- Consultants collaborate with professionals and executives to enhance operational and financial processes.

Course Objectives

Upon completion of the finance and accounting for nonfinancial managers course, participants will:

- Explain the nature and role of financial statements and interpret them.
- Effectively communicate in the language of accounting and finance.
- Review an organization's financial performance and position using appropriate ratios and break-even analysis techniques.
