Amsterdam (Netherlands)

Digital Practitioner Foundation Course

Ref.: 15236_286713 **Date:** 24 - 28 Feb 2025 **Location:** Amsterdam (Netherlands) **Fees:** 5500 Euro

Introduction:

This digital practitioner course will prepare the participants to gain fundamental knowledge about new industry standards, including key concepts such as digital transformation and digital-first, as well as the structure of the Body of Knowledge.

This comprehensive introduction serves as the cornerstone for becoming a proficient digital practitioner in today's rapidly evolving digital landscape. Master the essential digital foundation skills and understand the digital practitioner body of knowledge to enhance your expertise and become a certified digital practitioner.

The digital practitioner program assists individuals and organizations in crafting and managing product offerings with a growing digital component or guiding their organization through the twists and turns of Digital Transformation. It delivers in-depth guidance for the Digital Practitioner, aimed at those based in any domain of a business ecosystem, whether it be a traditional IT organization, manufacturing, sales, customer support, or integrated within an innovative product team.

Course Objective:

At the end of this digital practitioner course, participants will:

- Understand the fundamentals of digital transformation.
- Gain knowledge of digital business models and ecosystems.
- Learn about the role of IT in enabling digital practices.
- Acquire skills in digital innovation and design thinking.
- Explore digital governance and risk management strategies.
- Develop competencies in digital operations and delivery.
- Master the principles of digital product management.
- Understand customer engagement in a digital environment.
- Learn about digital leadership and culture change.
- Gain insights into digital technology trends and their impacts.

Targeted Competencies:

By the end of this digital practitioner training, participants competencies will:

- Learn how to create and manage product offerings with an increasing digital component.
- Lead your organization through Digital Transformation.
- Work as an IT professional within any organization, from a startup to a large enterprise, employing contemporary digital practices.

Targeted Groups:

This digital practitioner course is a diverse group of professionals who aim to master the foundational knowledge of digital practice standards:

- Senior digital business professionals, including C-level ones, must comprehensively understand digital practices.
- Mid-career IT professionals seek to update their skills and achieve digital marketing practitioner status.
- Subject Matter Experts SMEs looking to reinforce their expertise in specific domain areas.
- Entry-level computing and digital business professionals.
- Hiring managers and workforce strategists focusing on digital capability building.
- College-level students and majors in computing and digital businesses.

Course Content:

Unit 1: Introduction to the DP Standard:
