Introduction

All business activities are governed by writing policies and procedures. Much effort is spent on looking at how to draft documents. While this is important, it sometimes overshadows the importance of the Policy or Procedure and related documents such as Specifications and Standards.

The course policy and procedure writing certification will look at how these documents are created and some of the main clauses that appear in them, all using real examples wherever possible.

The course policy and procedure writing certification will then consider methods to be used in drafting Policies and Procedures, particularly how to avoid ambiguity and uncertainty. This area generates large numbers of errors, and the course aims to reduce the frequency of such mistakes and associated disputes.

Proficiency in Policy and Procedure Writing

Understanding how to create policies and procedures that are both effective and align with your organizations goals is a crucial skill.
