International Standards for Call Center Management ISO 18295 - Call Centers

Ref.: 15292_289297 **Date:** 02 - 06 Sep 2024 **Location:** Rome (Italy) **Fees:** 4900 **Euro**

Introduction:

One of the basic criteria that all governmental, business or civil bodies and institutions seek is customer satisfaction and satisfaction of desires and needs. Despite this, studies have proven that 50% of customer calls from most government agencies still need to be answered. Callers outside of work time are not answered, and the pressure of calls may also cause some of them to lose.

In the necessities of professional work between companies, providing technical support service to customers in a distinct manner is one of the basics of competitive work, and as a matter of strong competition in the labor market, the customer is looking for companies that have the greatest interest in his dealings, the more interest in the customer, the greater the demand for this field, which led to the need to pay attention to customer service in general and the quality and efficiency of call center operations in particular.

Adherence to international call center management standards is crucial for providing exceptional customer service and ensuring efficient operations. This course is aimed at those seeking to achieve and maintain the certification of the 18295 call center. It delves into the methods and strategies needed to develop a capable call center management system aligned with international standards.

Enhancing Call Center Management with International Standards:

International standards play a pivotal role in shaping the protocols and processes of call center management. Throughout this course and within this dedicated section, we will explore the call center standard and how implementing these standards can result in consistent, high-quality customer interactions. You'll grasp the essence of an international call center and how it differs from its domestic counterparts, and you'll understand the significance of call center standards in today's global business environment.

Targeted Groups:

- Call Center Managers.
- Quality Assurance Managers.
- Customer Service Supervisors.
- Operations Managers.
- Contact Center Team Leaders.
- Customer Experience Managers.
- Business Process Improvement Specialists.
- Training and Development Managers.
- Compliance Officers.
- Senior Customer Service Representatives.

Course Objectives:

At the end of this ISO 18295 international standards call center management training course, participants will be able to:

- Understand the critical role of customer service in a competitive market.
- Employ effective techniques for managing customer expectations and ensuring their satisfaction.
- Discover various modern call center configurations.
- Enhance service delivery for higher customer satisfaction.
