Healthcare Management & Operations Certificate

Ref.: 15090_292906 **Date:** 06 - 10 Oct 2024 **Location:** Kuala Lumpur (Malaysia) **Fees:** 3900 Euro

Introduction:

The current healthcare leaders must scan the environment, find ways to reduce operating costs while improving healthcare quality, and effectively deal with unforeseen turbulent times.

Agility and resilience are two skills that can help us think more effectively about dealing with changes and challenges. Both attributes represent “adaptive capacity,” which relates to how much energy and strength we need to address challenging, changing, and adverse situations.

This comprehensive certificate program in healthcare management and operations is for professionals seeking to enhance their skills and understanding in managing healthcare institutions and mastering operational procedures within the health sector.

What is Healthcare Operations Management:

Healthcare operations management is critical in ensuring that medical facilities run efficiently and deliver quality patient care.

In this healthcare operations management course, participants will explore solutions, understand the definition of healthcare operations, and learn how to apply healthcare operations improvement strategies.

The curriculum includes a focused healthcare operations management certificate viewpoint, making it ideal for those aiming to excel in this field.

Targeted Groups:

- Healthcare Senior Managers.
- Department Heads.
- Clinical Sections’ Heads.
- Other Healthcare professionals.

Course Objectives:

At the end of this healthcare operations management course, participants will be able to:

- Enhance their skills to manage and administer their hospitals/medical departments and prepare healthcare leaders to execute related programs and oversee improvement projects.
- Use seven thinking hats to acquire advanced skills for organizational success, leadership, effectiveness and efficiency techniques, and creative problem-solving.
- Gain a better understanding of quality principles and management functions.
- Provide training in the development and implementation of strategic planning.
- Maximize productive collaboration and minimize counterproductive behavior.

Targeted Competencies:

Upon the end of this healthcare operations management training, target competencies will:

- Lead and develop proactive mechanisms to avoid the potential risk.
- Manage your medical department in organizational matters.
- Be aware of all related strategy tools in addition to risk management.
- Have the ability to evaluate the healthcare status and challenges.
- Understand quality principles and healthcare management functions.
