Passenger Handling & Ground Operations Management Training

Ref.: 15051_293915 **Date:** 21 - 25 Oct 2024 **Location:** London (UK) **Fees:** 5800 **Euro**

Introduction:

This comprehensive passenger handling and ground operations management training course will equip participants with customer-centric skills and in-depth knowledge essential for various front-line staff roles in passenger services.

The passenger handling and ground operations management course spans various topics, including customer service excellence, conflict resolution, enhancing soft skills, and a thorough understanding of international passenger and baggage handling protocols.

Ground Operations Management and Airport Ground Operations:

Managing airport ground operations ensures safety and delivers high-quality passenger handling services. Participants will learn about various aspects of ground operations, including the significance of ground operations management, understanding the meaning of ground operations within the aviation context, and the processes involved in effective airport ground operations.

Targeted Groups:

- Airlines, Ground Handling, and Other Service Providers.
- Ground operations professionals.
- Passenger service managers.
- Airport authorities.
- Handling Agents and Other Customer Contact Personnel.
- Customer service instructors.

Course Objectives:

Participants completing this passenger handling and ground operations management course will be able to:

- Oversee an airline station with proficiency, whether self-handled or outsourced.
- Negotiate and implement ground operations training and service level agreements to meet station requirements, reduce expenses, and uphold service quality.
- Combat fraud through awareness of current fraudulent activities that undermine airline revenues.
- Adopt a station management system that aligns with industry safety and security standards and recommendations.
- Drive staff motivation and effectively monitor their performance.
- Utilize the IATA Airport Handling Manual AHM, which comes with the course.
- Develop or enhance management and leadership capabilities.
- Comprehend the necessity of operational and occupational health and safety training.
- Manage risks and formulate components of Emergency Response Plans ERPs.
- Understand SGHA contracts and service level agreements in greater detail.
- Investigate the best passenger/baggage handling and catering practices per the IATA AHM.
- Professionally handle customer inquiries and grievances while maintaining composure during difficult situations, converting crises into opportunities.
- Manage unexpected operational deviations and strategize for rapid recovery.
- Advocate for and make use of e-tickets.
- Ensure adherence to passenger and baggage handling standards.
- Impart knowledge and skills to colleagues and team members.

Targeted Competencies:

Target competencies completing this passenger handling and ground operations management course will be able to:

- Understand ground operations and ground operations management.
- Crisis communications.
- Understand airside operations and aviation ground operations.
- Understand the passenger handling process and airline passenger handling.
- Security awareness.
- Customer service skills.
- Aviation safety protocols and ramp security.

Course Content:

Unit 1: Crisis Communications and Media Response for Airport and Station Managers:

- Learn about the key factors in emergency response planning.
- Know the objectives of various stakeholders during crises.
- Techniques for informal press briefings.
- Manage social media during emergencies.
