Strategic Purchasing & Supply Management Course

Ref.: 4002_293968 **Date:** 09 - 13 Dec 2024 **Location:** Madrid (Spain) **Fees:** 4900 Euro

Introduction

Developing and implementing carefully crafted strategies for acquiring all goods, parts, equipment, and services have become critical in all organizations wishing to reduce operating costs while improving quality and productivity.

This strategic purchasing and supply chain management program explores key concepts of strategic cost/price analysis, value analysis, and total cost of ownership. It will move today's supply management organization from its typical tactical focus to the strategic focus needed to embrace the strategic role of purchasing in supply chain management and achieve world-class performance.

In today's competitive landscape, recognizing the strategic role of purchasing in supply chain management is pivotal. Purchasing decisions and processes are central to a company's overall strategy.

This strategic purchasing and supply chain management course delves into the intricate nature of purchasing and how it contributes to a sustainable and efficient supply chain model. Discussion on advanced supply chain management techniques will provide students with insights into modern procurement practices.

Upon completing this strategic purchasing and supply chain management course, participants will be awarded a purchasing and supply chain management certificate, which echoes their expertise in the field and prepares them for advanced roles within their organizations. This certificate validates acquiring skills necessary to handle strategic purchasing and supply chain management effectively.
