Medical Insurance Management Training Course

Ref.: 15406_298638 **Date:** 04 - 15 Aug 2025 **Location:** Boston (USA) **Fees:** 12000 **Euro**

Introduction:

Medical insurance is one of the most important financial sources covering the cost of medical treatment in the private health sector. It is a financial contract between the person who purchases health insurance and the insurance company. The contract has conditions that the buyer so that he is fully aware of what he has and what it is.

This medical insurance management course is for family and individual insurance contracts. Small enterprises also have disclosure clauses binding on the insured so that he discloses them. They are either not covered or priced, so the insurance price rises.

Companies' and institutions' insurance is subject to the Health Insurance Council's regulations, which contain details of what it covers and what is excluded from medical insurance. Suppose she needs to explain some medical conditions that are unclear to the insured and the service provider. The insured benefits directly from the network of service providers contracted with his insurance company.

The insured goes to the service provider directly, and the service provider requests consent from the beneficiary. In this service, the beneficiary gets approval or refusal to serve based on the terms of the contract. Medical service approvals are considered one of the bottleneck points in which the three parties sometimes have disputes, and insurance is usually.
