30 Dec 2024 - 03 Jan 2025  
Madrid (Spain)

# Oil and Gas Project Management Training Course

**Ref.:** 4079\_300163 **Date:** 30 Dec 2024 - 03 Jan 2025 **Location:** Madrid (Spain) **Fees:** 5500 Euro

## Introduction

This oil and gas project management program will present the latest in project delivery, planning and monitoring approaches and methodologies, negotiation strategies, and innovative technologies for the management of oil and gas projects with specific examples of what works and what does not.

This comprehensive oil and gas project management training course focuses on delivering advanced skills and knowledge in managing projects within the oil and gas sector. The Oil & Gas Project Management course integrates a range of concepts relevant to professionals seeking to enhance their expertise in oil and gas management, with a focus on project management competencies.

## Certification in Oil and Gas Project Management

Participants who complete this intensively tailored training will gain a deep understanding of the complexities of managing oil and gas projects, which may support them in achieving a certificate in oil and gas management. This acknowledgment can signal expertise to future employers and enhance a professional profile as an oil and gas project manager equipped with both theoretical and practical approaches to this dynamic industry.

## Targeted Groups

- Project management professionals.
- Commercial management professionals.
- Contracts management professionals.
- Financial management professionals.
- This oil and gas project management course is for all other business services professionals who are responsible for planning, decision-making, and controlling project schedules and costs in client and contracting companies.

## Course Objectives

At the end of this oil and gas project management course, the participants will be able to:

- Discuss advanced issues in project delivery systems.
- Explain the nature of design in oil and gas projects.
- Cover the management techniques for mitigating projects with compressed schedules.
- Identify project success factors and characteristics.
- Apply advanced applications of lead/lag scheduling in construction.
- Discuss the unique problems related to schedule updating, cost control, and cash flow.
- Gain negotiation skills that can diffuse conflicts and resolve disputes, thus saving time and money.
- Explain important warranty and contractual issues.
- Recognize the challenges of integrating state-of-the-art management methods and technologies for construction projects.
- Demonstrate the latest computer tools for project management.

## Targeted Competencies

- Identifying and managing stakeholders and communication needs in the oil and gas industry.
- Maintaining continuous project performance and delivery control.
- Accurately estimate and allocate project costs and resources.
- The compressor accelerates the schedule when required by adverse circumstances.
- Developing a project close-out plan in line with expected success criteria.
