Amsterdam (Netherlands)

ISO/IEC 20000 Lead Implementer Training Course

Ref.: 15380_306000 **Date:** 18 - 22 Nov 2024 **Location:** Amsterdam (Netherlands) **Fees:** 4900 Euro

Introduction:

Implementing a service management system SMS based on ISO/IEC 20000-1's standards has several advantages. The standard includes helpful practices in the service management industry. The requirements stated in 4 to 10 allow the organization to establish a structured approach to managing service provision activities and delivering value to its customers. The standard enables the organization to develop a baseline for improvement.

The management system is based on ISO's high-level structure HLS, allowing easier integration with existing management systems. The ISO/IEC 20000 Lead Implementer training program aims to give participants a thorough grasp of ISO/IEC 20000-1 standards, best practices, and methods for setting up and maintaining the service management system.

After attending the ISO/IEC 20000 Lead Implementer training session, you can take the exam. You can get the Certified ISO/IEC 20000 Lead Implementer certification if you pass the exam. The credential matches your professional talents and expertise in implementing an SMS based on ISO/IEC 20000-1 criteria.

What is ISO/IEC 20000?

ISO/IEC 20000 is the international standard for IT Service Management. It outlines management processes designed to help organizations deliver effective IT services. ISO 20000 provides significant benefits, providing a framework to ensure the efficient delivery and support of IT services that meet business and customer needs.

Course Objectives:

At the end of this ISO/IEC 20000 Lead Implementer course, participants will be able to:

- Get a thorough grasp of the ideas, strategies, tactics, and procedures employed in implementing and efficiently administering an SMS.
- Aware of the relationship between ISO/IEC 2000-01, the ISO/IEC 20000 family of standards, and other ISO standards.
- Get the capacity to comprehend ISO/IEC 20000-1 standards in the unique context of a company.
- Get the information and skills required to assist a company in efficiently developing, deploying, administering, monitoring, and maintaining an SMS.
- Know what is necessary to assist a company in implementing SMS best practices.

Targeted Groups:

- Managers or consultants are concerned with and engaged in deploying an organization's service management system.
- Management and staff wishing to assist their company in delivering value and fulfilling service obligations.
- Project managers, consultants, or knowledgeable advisors trying to build a service management system in compliance with ISO/IEC 20000-1 specifications.
- Those in charge of ensuring that a business complies with ISO/IEC 20000-1 standards.
- Team members who deploy SMS.
