Advanced Strategic Finance Management

Ref.: 15430_307647 **Date:** 09 - 13 Jun 2025 **Location:** London (UK) **Fees:** 5200 **Euro**

Introduction:

Because, over and above operating profit, a financial strategy is concerned with how organizations may create corporate value and reflect the increased shareholder value with the primary aim of maximisation of shareholder wealth. All organisations aim to optimise operating profit by increasing revenue streams and reducing operating costs. An understanding of financial strategy and the development of its associated financial skills further builds on that through evaluation and adoption of the appropriate financial strategies necessary for an organisation to survive and grow and achieve its long-term objectives.

This training course provides the participants with the essential skills and tools of financial strategy, and corporate finance, which is concerned with the effective use of financial resources to create corporate value. These skills are vital in today's global consumer and capital markets where competition is fierce for both investors and customers. This leading edge training course combines up-to-date theory with hands-on experience of developing powerful financial models and tools to equip the participants to take an active role the development and application of financial and business strategy.
