Accounting and Management of Fixed Assets According to Modern Standards

Ref.: 15468_309047 **Date:** 22 - 26 Jun 2025 **Location:** Cairo (Egypt) **Fees:** 3000 **Euro**

Introduction:

Accounting and asset management are essential tasks for any organization. Assets are the fundamental resources that organizations utilize in production and to generate future profits. This Fixed Asset Management and Accounting Standards course will discuss the managerial and accounting methods of these assets based on International Financial Reporting Standards. It will cover effective mechanisms for investing in finance lease agreements for fixed assets.

This Fixed Asset Management and Accounting Standards course will encompass all the standards related to accounting, management, and evaluation of assets, particularly within transitioning from a cash basis to an accrual basis, which helps achieve fair value for these assets. Participants will also be introduced to modern trends in managing, evaluating, and auditing fixed assets in light of risks and other international accounting standards for fixed assets.

This Fixed Asset Management and Accounting Standards training is divided into Fixed Asset Management and Accounting. It will cover performance management, evaluation, improvement, implementation of management plans, enabling management tools, controls, fixed asset policy, and strategy. The managerial will examine all the lifecycle processes of fixed assets management and include decision-making techniques such as IRR and NPV in capital budgeting.

The accounting will leverage International Financial Reporting Standards, focusing on fair value measurement and capitalization rules for tangible and intangible assets. Participants will gain an understanding of various impairment reduction techniques, valuation, and accounting by delving into fixed assets accounting entries and the fixed asset accounting standard, which will reveal a thorough fixed assets accounting definition.
