Clinical Documentation Improvement (CDI) for HIM

Ref.: 15484_309725 **Date:** 21 - 20 Apr 2025 **Location:** London (UK) **Fees:** 5200 **Euro**

Introduction:

In the dynamic landscape of healthcare, the accuracy and completeness of clinical documentation stand as linchpins for optimal patient care, regulatory compliance, and efficient reimbursement processes. The Clinical Documentation Improvement CDI for Health Information Management HIM course emerges as a cornerstone for professionals navigating this critical terrain. This comprehensive program is meticulously designed to empower Health Information Managers, Clinical Coders, Medical Records Specialists, and Healthcare Compliance Officers with the indispensable skills needed to elevate clinical documentation practices.

Participants will embark on a journey that goes beyond routine CDI protocols. They will delve into the fundamental principles that underscore the significance of meticulous documentation, exploring how CDI not only safeguards data integrity but also serves as a catalyst for healthcare quality enhancement and financial reimbursement optimization. As healthcare systems increasingly rely on electronic health records EHRs, this course will equip professionals with strategies to seamlessly integrate CDI into these digital frameworks, ensuring a holistic approach to information management.

By elucidating the symbiotic relationship between CDI and coding/classification systems, fostering adept communication skills, and honing the ability to bridge documentation gaps, this course seeks to empower professionals to not only meet regulatory standards but to champion a culture of continuous improvement in clinical documentation. In essence, it is a transformative journey into the nexus of healthcare data precision and the art of delivering quality patient care.

Targeted Groups:

- Health Information Managers
- Clinical Coders
- Medical Records Specialists
- Healthcare Compliance Officers
- Clinical Documentation Specialists

Targeted Competencies:

- Comprehensive understanding of clinical documentation standards
- Proficiency in coding and classification systems
- Ability to identify and rectify documentation gaps
- Skills in communicating effectively with healthcare providers
- Expertise in maintaining compliance with regulatory requirements

Course Objectives:

Upon completion of this course, participants will:

- Grasp the importance of accurate clinical documentation in healthcare settings.
- Develop proficiency in identifying and rectifying documentation gaps.

- Gain insights into coding and classification systems relevant to CDI.
- Enhance communication skills for effective collaboration with healthcare providers.
- Understand the regulatory requirements and compliance aspects of clinical documentation.

Course Outline:

Unit 1: Fundamentals of Clinical Documentation Improvement CDI

- Importance of accurate clinical documentation
- Role of CDI in healthcare quality and reimbursement
- Overview of regulatory standards governing clinical documentation
- CDI's impact on healthcare data integrity
- Case studies illustrating the consequences of inadequate documentation

Unit 2: CDI Process and Workflow

- Step-by-step CDI workflow
- Integrating CDI with electronic health records EHRs
- Collaborative strategies with healthcare providers
- Metrics and key performance indicators for CDI success
- Real-world examples of successful CDI implementations

Unit 3: Coding and Classification Systems

- In-depth exploration of ICD-10-CM and PCS
- CPT coding and its relevance to CDI
- Hierarchical Condition Categories HCCs and risk adjustment
- SNOMED CT and other terminology standards
- Practical coding exercises and case scenarios

Unit 4: Identification and Resolution of Documentation Gaps

- Methods for identifying common documentation gaps
- Physician query best practices
- Strategies for engaging healthcare providers in documentation improvement
- CDI tools and technologies
- Analysis of real-world documentation improvement scenarios

Unit 5: Communication Skills for CDI Professionals

- Effective communication with physicians and nurses
- Constructing queries that elicit accurate and detailed responses
- Handling challenging conversations
- Collaborative approaches to address documentation discrepancies
- Role-playing exercises for honing communication skills
