Strategic Quality Management

Ref.: 15506_312637 **Date:** 14 - 18 Apr 2025 **Location:** London (UK) **Fees:** 5200 **Euro**

Introduction:

Strategic Quality Management SQM is defined as a quality management philosophy that views quality in terms of overall corporate performance.

SQM defines quality as being driven by the needs of customers and the environment, and aims to identify the critical factors that will determine the survival and competitiveness of a company in the near future.

The objective is to identify the critical factors that will determine the survival and competitiveness of a company in the near future.

This course is specifically designed to provide effective methods and strategies for quality management. Learning Content

In this course, you will learn about implementing a master plan for organizational success and policies to improve customer relations.

Students will also experience the quality planning process. This course is supported by a variety of videos on the application of strategy and quality.

Upon completion of this course, students will have honed their quality, organizational, and people management skills and will be able to

become active in quality management, training, development, and other related fields.
