Emotional Intelligence and Customer Experience Course

Ref.: 15519_313098 **Date:** 23 - 27 Dec 2024 **Location:** London (UK) **Fees:** 5200 **Euro**

Introduction:

In light of recent economic developments and increasing competition, companies strive to survive in a hostile environment. Efforts made in recent years to improve customer service have become trivial, as huge amounts of money have been invested in Customer Relationship Management CRM to gather as much information as possible about customers and communicate with them better.

However, the efforts required to meet consumer expectations have advanced to a more competitive stage, where the concept of customer experience generates new competitive pressures. Leveraging emotional intelligence in customer service delivers a unique and compelling customer experience journey. Embracing emotional intelligence and customer service strategies can significantly improve customer experience solutions.

This emotional intelligence and customer experience course integrates key aspects of emotional intelligence for customer service professionals, aiming to enhance the ability to understand and respond to customer emotions effectively. Through the emotional intelligence and customer service focus, the participants will learn practical customer experience tools and be equipped to create customer experience frameworks that foster loyalty and satisfaction.

Participants will understand how emotional intelligence in customer service can strengthen the relationship between the customer and the brand. It will incorporate elements of customer experience designed to empower them with the skills to implement a robust customer experience program. They can apply the principles of emotional intelligence and customer experience to real-world scenarios, ensuring a memorable and positive interaction with the customers they serve.

Targeted Groups:

- Customer Complaints System Managers.
- Customer service employees and managers.
- Human Resources and Information Technology personnel.
- Anyone who finds themselves in need of this course and wishes to develop their skills and expertise.

Course Objectives:

At the end of this emotional intelligence and customer experience course, the participants will be able to:

- Explain the importance of managing a customer complaints system to improve organizational performance.
- Implement a customer feedback system to increase customer satisfaction and retention.
- Manage each stage of handling complaints from preparation to resolution.
- Develop relevant key performance indicators to evaluate and review complaint systems.
- Evaluate existing systems and align them with the best international standards for complaint management.

Targeted Competencies:

By the end of this emotional intelligence and customer experience training, the participant's competencies will:

- Achieving customer service excellence through measuring service quality and understanding its concept.
- System standards and procedures for managing and handling complaints.
- Efficiency and innovation in customer complaints system management.
- The art of effective communication and interaction with customers and influencing them.
- Creative handling of customer complaints, analyzing objections, and responding to them.
