Manama (Bahrain)

Medical Insurance Management Training Course

Ref.: 15269_314826 **Date:** 11 - 20 May 2025 **Location:** Manama (Bahrain) **Fees:** 3900 Euro

Introduction:

Medical insurance is one of the most important financial sources that covers the cost of medical treatment in the private health sector. It's a contract between the health insurance holder and the insurance company. Medical insurance has conditions, and the purchaser of the insurance contract must read it carefully to be fully aware of all terms.

Also, individual and group insurance contracts include disclosure in the insurance application, referring to the statements in the application; either the company accepts the insurance, rejects it, or covers it on limits. After the contract is issued, the insured benefits from the network of service providers contracting with his insurance company.

The insured goes to the service provider Hospitals, Clinics, Doctors, Pharmacies, etc. and requests approval for the treatment. In this service, the beneficiary obtains approval or rejection of the service based on the terms of the contract.

Throughout this course, we will delve into the intricacies of medical insurance management, focusing on the role of the medical insurance manager and the critical importance of global medical management insurance.

By participating in our comprehensive medical insurance training and following the robust medical insurance course syllabus, individuals will gain the expertise needed for executing effective medical management programs in insurance.
