Documents and Records Management (Document Control Specialist) Course

Ref.: 9030_318065 **Date:** 13 - 17 Jul 2025 **Location:** Online **Fees:** 1500 Euro

Introduction:

Managing a growing volume of documents and records can be challenging. This document control course focuses on effective strategies, tools, and technologies essential to categorizing, managing, storing, preserving, and delivering documents and records in line with business processes. Dive into the core components of ISO 15489 to embrace compliance with best practices in records management.

Enhance your expertise in document control and records management with this comprehensive course designed to take you on a journey through the world of managing important documentation.

Align your skills with industry standards, including records management ISO 15489 and information security ISO 27001, to ensure compliance and security in handling your organization's data resources.

Learn the intricacies of managing both paper and electronic records, enhance your understanding of best practices, and get introduced to the latest technological solutions.

Embark on this document controller training course and certificate in records management course to elevate your career competencies. By mastering documents and records management, you will become an integral asset to any organization, ensuring the integrity, accessibility, and security of vital information.

What is a Record Management Course?

This document control and records management course embodies proper document and record management principles and practices. From understanding the document life cycle to implementing comprehensive records management systems in compliance with ISO 15489, this certification training is tailored to prepare professionals to effectively oversee their organization's documentation infrastructure.

Targeted Groups:

- Professionals and leaders looking to master document management strategies to enhance organizational efficiency.
- Individuals stepping into leadership roles need to manage paper and electronic documents effectively.
- Information Security Professionals.
- Document Controllers, Administrators, and Management Supervisors.
- Document and Records Management Personnel.
- Executives.
- Users of Document and Records Management Systems.
- Personnel are aiming to upgrade their document control and records management expertise.

Course Objectives:

Participants will leave the document control and record management course with the ability to:

- Grasp the document and records management lifecycle.
- Understand the ISO 15489 records management standard.
- Apply the steps to implement a records management system based on ISO 15489.
- Develop a comprehensive document and records management plan.
- Use workflows, business processes, and collaboration to manage information and content.
- Evaluate industry-leading solutions and technologies.
- Utilize metadata, classification schemes, and retention plans.
- Recognize pertinent legislation, standards, and regulations.
- Install efficient search and retrieval systems.
- Enforce appropriate access controls and security measures.
- Set up robust storage models and technologies with a secure audit trail.

Targeted Competencies:

Target competencies will leave the document control and record management course with the ability to:

- Mastery of the key concepts and architectural scope in document management.
- Development of meaningful business cases and identification of business requirements.
- Using the concepts of document and records management to deliver business drivers.
- Integration of document and records management across the organization.
- Formulation of an Enterprise Content Management ECM strategy in parallel with document and records management.
- A thorough grasp of ISO 15489 and ISO 27001.
