

HR Metrics and Analytics Training Course

HR Metrics and Analytics Training Course

Introduction

The HR function is a high-value-added part of the organization and is crucial in developing and implementing corporate strategy. This HR metrics and analytics course is because of the growing importance of human capital in organizational success.

The HR function needs to be more effective as a strategic partner in the organization rather than a purely administrative function. Such an HR function will drive and deliver change rather than react to it.

After participating in the HR metrics and analytics course to achieve this highly desired HR prize, the HR function must develop its ability to measure how HR decisions affect the organization and how its decisions affect human capital. In short, the HR function needs to develop better metrics and analytics to become a true strategic partner.

Once the metrics are established, the organization must develop HR policies that react to the messages. The HR metrics and analytics course will also consider the type of HR policies being developed in response to the usual range of messages from the metrics and analytics.
