

Understanding the Basics of Human
Performance Course

Understanding the Basics of Human Performance Course

Introduction

Understanding of the human performance improvement and measurement course delves into the intricacies of human behavior, motivation, and performance within various professional contexts. By exploring the psychological drivers of behavior, this human performance improvement and measurement course equips participants with the knowledge to effectively manage and improve human performance.

People are inherently complex and are impacted by many personal and workplace challenges. Issues such as work-related stress, interpersonal problems, and job insecurity can significantly affect an individual's health and performance, leading to a decline in overall workplace productivity.

The human performance improvement and measurement course addresses the rising concern of stress in the workplace, with research from the International Stress Management Association highlighting that a significant portion of the workforce experiences stress-related issues.

The amount of employees suffering from stress and stress-related illnesses is rapidly rising. More than half 53% of people at work have suffered from stress in the past 12 months, while one in four people had taken time off sick through stress in the previous year, according to the latest research by the "International Stress Management Association."

Human Performance Measurement

This human performance improvement and measurement course will explore the tools and methods used to quantify and analyze human performance within professional settings. It will cover how metrics are determined, collected, and interpreted to guide improvements in performance.

A focused study on the strategies and criteria used to assess the effectiveness of human performance initiatives and interventions. This module would help human performance improvement and measurement course participants identify key performance indicators and use evaluation techniques to inform decision-making.

Insights on the latest approaches and methodologies for enhancing individual and team performance within organizations. It would include practical training strategies and interventions designed to elevate performance.

An in-depth study of the core principles guiding human performance, touching on theories, frameworks, and practices integral to the understanding and applying performance improvement strategies. It would address specific training programs geared toward elevating skills and competencies in performance management and improvement within various professional domains.

Human Performance Certification

Addressing options for formal certification and recognition in human performance may benefit professionals seeking to establish expertise and credibility in the field.

By integrating these concepts into the human performance improvement and measurement course, participants would have a comprehensive education to prepare them for managing and improving human performance challenges.

Targeted Groups

- Managers, Supervisors, and Team Leaders
- HR Staff
- Employees across all departments seeking to enhance their knowledge and skills to improve workplace performance

Course Objectives

Upon completing this human performance improvement and measurement course, participants will have the ability to:

- Understanding human behavior.
- Appreciate how attitude affects behavior and motivation.
- Manage employee performance.
- Understand people's problems at work.
- Identify and develop the critical skills needed for stress management.
- Develop effective workplace interventions.
