Effective Contract Negotiation and
Management

Mastering Public-Private Partnerships: Effective Contract Negotiation and Management

Introduction

Public-Private Partnerships have become a strategic mechanism for delivering large-scale infrastructure and public services, requiring advanced knowledge in planning, negotiation, and governance. This course provides a comprehensive foundation in the principles, structures, and contractual mechanisms that shape modern PPP frameworks. It explores negotiation strategies that ensure balanced risk allocation, performance accountability, and long-term financial sustainability. Participants will learn how to assess PPP project feasibility, evaluate stakeholder interests, and understand regulatory and contractual requirements. The training also examines contemporary PPP models worldwide and highlights methods to improve decision-making. By the end of the program, learners will develop a strong capacity to manage PPP agreements effectively throughout their lifecycle.

Targeted Groups

This Mastering Public-Private Partnerships: Effective Contract Negotiation and Management targets professionals seeking specialized knowledge and skills:

- Public sector policy officers.
- PPP project managers.
- Infrastructure planning specialists.
- Legal advisers in contract negotiation.
- Financial analysts are involved in project finance.
- Regulatory and compliance specialists.
- Private sector investors and contractors.
- Consultants supporting government initiatives.

Course Objectives

Participants will achieve the following objectives by mastering the " Mastering Public-Private Partnerships: Effective Contract Negotiation and Management course:
