Leadership Skills

Performance Improvement & Leadership Skills

Introduction

Effective performance improvement and leadership skills are essential for organizations striving to achieve sustainable growth, operational excellence, and high employee engagement. This course equips professionals with the knowledge and strategic frameworks required to enhance individual and team performance in dynamic business environments. It focuses on developing leadership capabilities that drive productivity, accountability, and continuous improvement across all organizational levels. Participants will explore modern performance management techniques, leadership styles, and decision-making approaches aligned with business objectives. The program emphasizes practical methods for identifying performance gaps, implementing corrective strategies, and fostering a culture of high performance. Integrating performance improvement strategies with leadership development helps professionals achieve measurable results and long-term organizational success.

Targeted Groups

This Performance Improvement & Leadership Skills training targets professionals seeking knowledge and skills:

- Managers are responsible for team performance.
- Team leaders aiming to improve leadership impact.
- Supervisors manage daily operations.
- HR professionals supporting performance management systems.
- Project managers drive team productivity.
- Business professionals seeking leadership development.
- Department heads focused on continuous improvement.
- Professionals preparing for leadership roles.

Course Objectives
