

Governance in Public Financial Management

Governance in Public Financial Management

Introduction

The Governance in Public Financial Management course provides an understanding of how governance principles strengthen financial decision-making, accountability, and transparency within public institutions. It explores the relationship between effective governance frameworks and public financial management systems to support responsible resource allocation. It examines policies, controls, and institutional practices that enhance fiscal discipline and improve public sector performance. Participants will gain insights into financial governance structures, risk management approaches, and accountability mechanisms applied in government organizations. The program addresses modern challenges related to public finance reform, ethical leadership, and sustainable financial management. Learners will improve governance and financial practices in the public sector.

Targeted Groups

This Governance in Public Financial Management training targets professionals seeking knowledge and skills:

- Public finance managers are improving financial governance practices.
- Government officials managing public sector financial operations.
- Budget officers are strengthening budget planning and control.
- Auditors are enhancing public financial accountability processes.
- Policy advisors are developing effective financial policies.
- Finance professionals supporting government resource management.
- Internal control specialists are improving compliance frameworks.
- Public administration leaders advancing institutional governance.
- Risk managers addressing public finance challenges.

Course Objectives

Participants will achieve the following objectives by completing the Governance in Public Financial Management course:

- Understand the foundations of governance in public financial management systems.
- Analyze principles of transparency, accountability, and ethical financial administration.
- Identify key components of effective public financial governance frameworks.
- Evaluate financial control mechanisms supporting government performance.
- Develop awareness of public sector budgeting and resource allocation practices.
- Examine risk management approaches within government financial operations.
- Understand the role of internal controls in improving financial integrity.
- Assess the governance challenges affecting the effectiveness of public financial management.
- Apply the concepts of financial accountability to public-sector environments.
- Recognize strategies for improving fiscal discipline and operational efficiency.
- Explore international practices supporting public finance governance reforms.
- Strengthen decision-making capabilities related to government financial policies.
- Improve understanding of compliance, oversight, and institutional responsibility.

Targeted Competencies

Participants will gain the following competencies during the Governance in Public Financial Management program:

- Understanding public financial governance principles and structures.
- Evaluating accountability systems within government institutions.
- Applying transparency practices in financial administration.
- Assessing financial risks affecting public organizations.
- Developing effective internal control approaches.
- Analyzing public budgeting governance processes.
