Excellence

Developing Leadership and Technical Skills for Sustainable Organizational Excellence

Introduction

In modern work environments, effective leadership is no longer based solely on managerial skills, just as technical excellence alone is no longer sufficient to achieve sustainable organizational success. The contemporary leader needs a balanced combination of leadership skills that enable them to influence, guide, and make decisions, along with technical skills that provide a deep understanding of the nature of work and its operational and technical challenges. This advanced training course is designed to provide participants with an integrated approach that combines strategic leadership and technical excellence, enhancing their ability to lead teams, improve performance, and achieve organizational results efficiently and professionally.

Targeted Groups

- Executive managers and department managers.
- Heads of departments and supervisors.
- Team and project leaders.
- Technical professionals being considered for leadership positions.
- Specialists in business development and performance improvement.
- Professionals seeking to enhance their leadership and technical capabilities.
- Professionals responsible for operations, quality, and organizational excellence.

Course Objectives

By the end of this program, participants will be able to:

- Develop advanced leadership skills in modern work environments.
- Develop the technical skills required to understand and analyze operational processes and activities.
- Enhance the ability to make data-driven decisions.
- Build effective communication, influencing, and professional relationship management skills.
- Enable participants to manage teams and achieve high levels of performance.
- Develop strategic thinking and align it with operational objectives.
- Foster a culture of continuous learning and sustainable improvement.
- Enhance participants' capabilities to lead change and manage organizational challenges.
- Apply modern leadership approaches in various managerial situations.
- Utilize technical skills to support managerial and operational decisions.
- Analyze complex problems and develop effective practical solutions.
- Build high-performing teams and motivate them to achieve results.
- Manage organizational change processes efficiently and confidently.
- Employ communication skills to strengthen collaboration and trust within the team.
- Align daily objectives with the organization's strategic vision.
- Develop sustainable personal development plans to enhance professional capabilities.

Targeted Competencies

- Leadership and influence.
- Professional and managerial intelligence.

- Strategic thinking.
- Performance management.
- Decision-making.
- Team management.
- Problem-solving.
- Effective communication.
- Change management.
- Technical and operational analysis.
- Continuous learning.
- Sustainable improvement and development.

Course Content
