

Strategic Financial Management and
Corporate Finance Skills

Strategic Financial Management and Corporate Finance Skills

Introduction

The Strategic Financial Management and Corporate Finance Skills course develops the financial thinking needed to connect corporate strategy with sustainable business performance. It examines how financial managers evaluate investment opportunities, financing choices, liquidity needs, and shareholder value. It covers strategic financial planning, financial analysis, capital budgeting, cost of capital, capital structure, and working capital management. Participants explore financial forecasting, scenario analysis, risk assessment, and performance measurement to support informed executive decisions. The program addresses valuation, cash flow management, resource allocation, and corporate financial strategy within changing business conditions. It emphasizes analytical judgment, financial discipline, and translating financial information into practical strategic decisions.
