

Stakeholder Management Training Course

Stakeholder Management Training Course

Introduction:

A stakeholder is an individual, group, or entity interested in a company because its activities impact them or have the potential to do so. Stakeholder management manages these relationships to align stakeholders' needs and potential contributions with the organization's goals.

This course offers insights into stakeholder management and provides the necessary skills to execute it effectively. Participants will learn about effective stakeholder management through hands-on experiences applying a stakeholder management plan.

Discover the meaning of stakeholder management and leverage stakeholder management tools to engage and manage stakeholders effectively. By understanding the definition of stakeholder management and utilizing best practices, participants will master the stakeholder management process, including internal stakeholder management.

This Stakeholder management training is integral to learning how to manage various stakeholder groups and implement stakeholder management strategies within any stakeholder management system. Recognizing why stakeholder management is important will help you appreciate its advantages. It is an important step towards achieving a practical approach to stakeholder management and realizing its benefits.

Targeted Groups:

- Senior leaders and managers.
- Novice supervisors and managers.
- Competent supervisors and employees, especially those in HR and finance.
- Individuals who need to understand stakeholder involvement.
- People are participating in transformational initiatives.
- PMO, project, and program staff.

Course Objectives:

At the end of this stakeholder management course, participants will be able to:

- Understand the importance of stakeholder management in project success.
- Identify and categorize stakeholders effectively.
- Analyze stakeholder needs, expectations, and influence.
- Develop effective communication strategies for different stakeholder groups.
- Create and implement a stakeholder management plan.
- Utilize tools and techniques for stakeholder engagement and management.
- Resolve conflicts and manage stakeholder relationships.
- Monitor and evaluate stakeholder engagement activities.
- Enhance negotiation and influencing skills for managing stakeholders.
- Ensure alignment of stakeholder objectives with project goals.

Targeted Competencies:

By the end of this stakeholder management training, participants' competencies will:

- Stakeholder Identification.
- Stakeholder Analysis.
- Communication Strategy.
- Conflict Resolution.
- Relationship Management.
- Engagement Techniques.
- Negotiation Skills.
- Influence and Persuasion.
- Project Alignment.
- Performance Monitoring.

What is Stakeholder Management?

Stakeholder management involves systematically identifying, analyzing, planning, and implementing actions to engage stakeholders. It aims to build positive relationships with individuals or groups that can impact or be impacted by organizational activities.

Why is Stakeholder Management Important?

The importance of stakeholder management cannot be overstated. It leads to improved outcomes, ensures stakeholders' voices are heard in decision-making, and boosts project success and sustainability. Understanding the importance of stakeholder management allows for the creation of best practices for stakeholder management and the application of insights from case study scenarios. Professionals will take on stakeholder management responsibilities more effectively, employing tools and techniques.

Course Content:

Unit 1: Stakeholder Management Processes and Documentation:

- Describe how to identify and prioritize stakeholders, as well as how to understand their expectations.
