

Advanced Strategies in Training,  
Development, Organizing, and  
Evaluation

# Advanced Strategies in Training, Development, Organizing, and Evaluation

## Introduction:

Training and administrative development in institutions is one of the means of developing human capital that depends on it to raise the level of functional efficiency of employees, as training and development in its modern concept is an integrated framework and a strategic choice in the human resources development system that institutions seek to achieve in order to keep pace with the challenges represented in the changing work requirements, as training leads to the transfer of technical and practical knowledge in a way that enables the employee to face any challenges imposed by the acceleration of knowledge within the work environment.
