

Procurement and Supply Chain Management Conference

Procurement and Supply Chain Management Conference

Introduction:

The Procurement and Supply Chain Management conference is vital to many businesses, forming the backbone of efficient operations and cost management. It promises an extensive educational experience for professionals seeking certification. By attending, participants can edge closer to attaining a procurement and supply chain management certification, recognized for its role in validating expertise and competencies in the field.

This procurement and supply chain management conference will explore developing and implementing carefully crafted strategies for acquiring all materials, goods, equipment, and services. It aims to provide a comprehensive view of procurement and explore leading-edge issues currently faced by organizations to improve quality, increase productivity, and ultimately reduce operating costs.

This procurement and supply chain management conference will focus on the latest industry trends, including sustainable and ethical procurement, digital transformations, and integrating Artificial Intelligence and Machine Learning into supply chain practices. Participants will explore the strategic aspects of procurement, such as identifying the procurement and supply chain management that directly influence organizational success.

Targeted Groups:

- Contracts, Purchasing, and Procurement Personnel.
- Project, Engineering, Operational, and Maintenance Personnel involved in the planning and execution of purchases and contracts.
- Supply, Buying, Purchase, Logistics, Materials, and Supply Chain Professionals.
- Individuals in organizations seeking high competency levels in acquisition activities.
- Professionals seeking to enhance their understanding of Logistics and Supply Chain Management.
- Those aiming for business gains through more effective supply chain management.

Conference Objectives:

At the end of this procurement and supply chain management conference, participants will be able to:

- Achieve a thorough understanding of the best practices in procurement and supply chain management.
- Establish the mission, vision, and knowledge needed to successfully implement the processes and methods needed to reach world-class performance.
- Overview of the key drivers involved when viewing supply chains from a logistics/demand point of view.
- Explain what procurement and supply chain management are fundamental.
- Review the meaning of strategic procurement.
- Give examples of best practices in procurement and the supply chain.
- Review how to obtain the best pricing.
- Understand how to develop spend analysis.
- Develop a functional and cross-functional view of the supply chain.
- See that working with all of the supply chain players pays better.
- Consider Key Performance Indicators KPIs with procurement and supply chain management.

Targeted Competencies:

Participants' competencies in this procurement and supply chain management seminar will improve:

- The ability to deliver real value in a shorter time.
- Reduce the number of non-value-adding activities.
- Improved relations between personnel, customers, and suppliers.
- Reduction in total cost of ownership.
- Improved supplier performance.
- Analysis.
- Evaluation.
- Improving.
- Make a change.
