

Understanding Human Performance Improvement Training Course

Understanding Human Performance Improvement Training Course

Introduction

Knowing the drivers determining individual behavior, action, and motivation is the key to understanding and managing people. This human performance improvement program delves into our assumptions about human behavior and psychology. Human performance principles guide us in deciphering why people do what they do and how to foster an environment that supports human performance improvement.

People are complex, and many factors, including personal and work-related challenges, can influence their performance at work. From workplace stress and marriage issues to job insecurity, the myriad of potential problems can significantly impact employees' health and performance. Human performance safety training considers these aspects to mitigate the risk and cost to the employer.

Human performance certification programs often include coping strategies for stress, now increasingly prevalent in the workforce, as a core component for enhancing overall workplace wellness and productivity. The amount of employees suffering from stress and stress-related illnesses is rapidly rising. More than half 53% of people at work have suffered stress in the past 12 months, while one in four people had taken time off sick through stress in the previous year, according to the latest research by the International Stress Management Association.

Applying Human Performance Tools and the Improvement Process

Human performance tools are integral to the human performance improvement process. They are vital for identifying human performance traps and fostering human organizational performance.

Performance improvement certification, such as the human performance improvement certification, instills these tools to help professionals identify areas for improvement. Exploring these tools, participants will learn ways to facilitate safety and efficiency, embedding human performance safety practices into their organizational culture.

As part of an important and evolving field, the human performance improvement course highlights the importance of continuous learning and development for professionals in this sector.

Through this human performance training course, participants will develop a robust understanding of human performance improvement and the necessary skills to implement effective organizational strategies.

Targeted Groups

- Managers, supervisors, and team leaders.
- HR personnel.
- Training managers and training personnel.
- Succession planners and those responsible for people development.
- HR practitioners and line professionals.
- Professionals with an interest in people management and development.

Course Objectives

Participants in this human performance training course will be equipped with the knowledge to:

- Clearly understand human behavior.
- Comprehend how attitude impacts behavior and motivation.
- Manage employee performance through:
 - Performance appraisal interviewing practice
 - Discipline and grievance case studies and examples
- Recognize and address people's problems at work.
