- Defining logistics and supply chain management.
- Exploring the interrelation of buying, making, moving, and selling activities.
- Historical development and impact of logistics and supply chain on businesses.
- Understanding the supply chain dynamics.
- Supply Chain Operations Reference Models SCOR.
- The Theory of Constraints TOC.

Unit 8: Key Aspects and Rules of Supply Chain Management

- The cost/service balance.
- Customer service principles.
- Internal organizational structures.
- Inventory principles.
- Lead times throughout the supply chain.
- Adding value.
- Production options/changes.
- Trade-off opportunities.

Unit 9: The Benefits of Adopting a Supply Chain Approach

- Understanding the sub-functional conflicts.
- Benefits within and between functions.
- Taking a supply-chain view of total acquisition costs.
- Accepting that competitive advantage comes from the supply chain.
- Looking at demand amplification and the "Forester" effect.
- Appreciating the effects of uncertainty and unresponsiveness.
- Seeing how we currently manage the supply chain.
- Changing the way we manage the supply chain for greater effectiveness.

Unit 10: Strategic Approaches and Impacts to Supplier/Customer Relationships

- Practical effects on lot sizes/order quantities.
- Reducing costs.
- Sharing developments and collaborating.
- Eliminating internal and external barriers.
- Interfacing versus integrating relationships.
- Segmentation and product formatting.
- Business strategies and the supply chain.
- Supply chain planning.
- Gaining competitive advantage.
- Considering outsourcing.
- Using postponement and consolidation logistics.
- Examining demand planning.
- Approaches of Quick Response QR, Vendor Managed Inventory VMI.
- Collaborative Planning and Forecast Requirements CPFR.
- The lean supply chain.

Unit 11: Making Supply Chain Improvements

- Manufacturing and retailer case studies.
- The major lessons and key aspects from experience.
- Oil and Gas in the UK experiences.
- Key questions to be answered.
- The changes needed with suppliers and customers.
- The changes need to be made to internal organization and management practices.
- Potential action is needed.
- The 'doing nothing' future, with 'lessons from experience.'
- Guarding against futures of higher stock levels and competition gains.
- Breaking down traditional silo/closed management.
- The 5 steps approach to logistics and supplier development.
- Encore: The supply chain rules.
- The rules to give competitive advantage from effective Supply chain Management.
